

# BIOBANKING FOR PERSONALIZED MEDICINE – MORE THAN JUST STOCK LOGISTICS.

## CENTRAXX® from Specialists for Experts

KAIROS' premier software is **CentraXX**, a highly integratable and streamlined software solution for managing biobanks, biotech, clinical trials, hospitals and all that lies between. **CentraXX** Bio is the solution catered for biobank management systems.

**CentraXX** Bio offers the complete toolset for managing your biobank, from patient registration to bio-sample management and data representation. This all-in-one software solution stores all data in one secure and organized database, making it easy to run searches and reports.

*“CentraXX has revolutionized the way our donor data is captured and managed. Data is now documented in a consolidated, structured, and reportable environment.”*

–Finch Therapeutics Project Manager, Samantha Kitchen

## Personalized Software for Personalized Medicine

Biobanking in the age of personalized medicine means contextualizing samples within the bigger picture. **CentraXX** Bio helps your biobank do just that by linking all biosample data back to the donor and presenting them in a longitudinal view. **CentraXX** Bio also offers integrated interfacing to other systems, tools, and partners across your biomedical landscape.

KAIROS implements a quality management system that complies with DIN EN ISO 13485:2012 requirements

- > **Data Protection and Security** | HIPAA & GDPR Compliance | Pseudonymization
- > **Multi-User Capability** | User and Role Configurability | Virtual Networks
- > **Consent Management** | Sample Tracking | Sample Locking

- > **Sample Life-Cycle Management** includes full chain of custody from extraction to sample analysis
- > **Stock Location Management** optimizes inventory processes and storage systems
- > **Sample Automation and Interfacing** links robotic capabilities for batch processing and holistic data aggregation
- > **Integrated Reporting** automates ad-hoc reporting on all data collected in the biobank database
- > **Audit Trail** automatically records all changes made to the database in a transparent and easily accessible history log
